

DPP – 19

Question 1

Apply Data Validation to restrict Quantity values to only whole numbers between 1 and 10.

Ans : Please follow mentioned steps to achieve the scenario :

1. Select the Quantity column
2. Go to Data-> Data Validation
3. Click on Add Rule.
4. Select the range and criteria -> Is between 1 and 10
5. In Advance Options select If data is Invalid ->Reject the Input

Question 2

Highlight all "Total Price" values greater than \$2000 in green using Conditional Formatting.

Ans : Please follow mentioned steps to achieve the scenario :

1. Select the Total Price column .
2. Select Format -> Conditional Formatting
3. In Format Cells if -> Greater than -> 2000
4. Formatting style -> Fill with green color

Question 3

Remove duplicate records where "Order ID" is the same.

Ans : Please follow mentioned steps to achieve the scenario :

1. Select Order Id column .
2. Navigate to Data -> Data Clean Up -> Remove Duplicates
3. Duplicates will be removed from the dataset.

Question 4

The "Customer Name" column contains full names. Split them into "First Name" and "Last Name."

Ans : Please follow below steps:

1. Select the Customer name column.
2. Click on the Data -> Split text To Columns option
3. Select Delimited option, select space option and in destination select the First name column address(\$C\$2) and click Finish button.
4. Drag the values to bottom of same column and select the Flash Fill option .
5. The first name and last name should be populated successfully.

Question 5

Use Conditional Formatting to highlight rows where "Category" is "Electronics" and "Total Price" is greater than \$1000.

Ans : Please follow below steps:

1. Select the Category column and click on the Conditional Formatting option -> New Rule-> Use formula to determine which cell to highlight
2. In the formula tab and write formula =AND(\$H2='Electronics',\$K2>1000)
3. In the applies to section select the range where the rule has to be applied.

The screenshot shows a Microsoft Excel spreadsheet with a dataset of orders. The 'Conditional Formatting Rules Manager' dialog box is open, showing a new rule being created. The rule is based on the formula `=AND($H1='Electronics',$K1>1000)` and is applied to the range `=Sheet1!$K$101`. The rule is named 'AaBbCcYyZz'.

Question 6

Filter the dataset to show only orders from the "North" region.

Ans : Please follow below steps:

1. Select the Region column from the dataset and click on the Filter option .
2. Now from the filter applied on the Region column select North option.
3. Orders from only the North region should be reflected in the dataset.

Question 7

Some "Quantity" values contain text (e.g., "Five"). Find and correct these errors.

Ans : Please follow below steps:

1. Select the Quantity column from the dataset.
2. Click on the Find and Select->Replace option
3. Replace Five with 5 and click OK.
